

BENEFITS

- Degreases and disinfects in one operation
- EDTA free, aldehyde free
- Bactericidal, yeasticidal, sporicidal and virucidal
- Food contact agreement

Formule douce

APPLICATION

SANICID® 5 DDI is a concentrated odorless degreaser-disinfectant for the cleaning and disinfection of floors and surfaces in the agro-food, pharmaceutical and cosmetic industries.

Complies with the decree of 19/12/13 amending the decree of 08/09/1999 concerning products for cleaning materials and articles intended to come into contact with foodstuffs.

INSTRUCTIONS FOR USE

Dilute SANICID® 5 DDI from 0,25% to 2%.

Use in wet wiping or to wash floors, surfaces, furniture and sanitary.

Do not rinse (unless in contact with foodstuffs).

The diluted product can be stored for up to 7 days in a closed bottle and stored according to the recommendations of the MSDS, otherwise 24 hours maximum.

CHARACTERISTICS

Appearance :	liquid
Colour :	colourless
Perfume :	odourless
Density :	= 1
pH :	low base

PRODUCT TYPE

Surfaces disinfection (PT2-PT4)

Use biocides safety. Before using, read the label and product information.

ACTIVE SUBSTANCES

Contains:

Didecyldimethylammonium chloride - N° CAS 7173-51-5 - Concentration 15 % (m/m)

Benzalkonium chloride - N° CAS 68424-85-1 - concentration 10 % (m/m)

MICROBIOLOGICAL ACTIVITY

Bactericidal : EN 1276 (dirtiness conditions – 0.5% – 5 min – 20°C), EN 13697 (dirtiness conditions – 0.5% – 5 min – 20°C), NF EN 13727 (dirtiness conditions – 0.5% – 5 min – 20°C), NF EN 14561 (dirtiness conditions – 1% - 5 min – 20°C)

Yeasticidal : EN 1650 (dirtiness conditions – 0.25% – 15 min – 20°C), EN 13697 (dirtiness conditions – 0.25% – 15 min – 20°C), EN 13624 (dirtiness conditions – 0.5% – 5 min – 20°C), NF EN 14562 (dirtiness conditions – 0.5% - 15 min – 20°C)

Sporicidal : EN 13704 (cleanliness conditions – 5% – 60 min – 20°C)

Virucidal : EN 14476 sur PRV*, BVDV*, H1N1 (dirtiness conditions – 2% – 5 min – 20°C), Herpès, Vaccinia virus, Rotavirus (dirtiness conditions – 0.5% – 5 min – 20°C), Norovirus (dirtiness conditions – 2% – 15 min – 20°C)

* Swine Pseudorabies Virus (PRV) and Bovine Viral Diarrhea Virus (BVDV) are surrogate of HBV and HCV.
